

Empowering People to Make Successful Transitions

Career Profiling and Psychometric Services

Reach Your Career Potential!

In a fast changing job market people are faced with more and more choice about the career path they wish to embark on, yet there is limited support to help them make informed decisions.

Lincolnshire's Complete-Careers can help you become more self-aware and discover more about your personality traits and qualities, as well as providing suggestions for careers that may be of interest to you. See below for silver and gold support packages to help you, or contact us to arrange a bespoke service to meet your need:

Silver Package

This service enables you to gain direction to help with your career planning in the comfort of your own home! The silver package costs £25 and provides a profiling service to help you understand personality traits and qualities, along with a list of possible careers to match your profile. This is a simple and effective system where we provide you with a multiple-choice questionnaire via email or through the post. Complete and return it to us and in return you will receive helpful information about your personality profile, suggested careers linked to the profile and reputable sources to find out more information.

Gold Package

This package provides a full careers psychometric profile service, helping you discover your future career. The service is suitable for individuals aged 15 and over and is equally as useful for adults of any age. Through scientific assessment of abilities, innovative questionnaires and web-based resources, this package can help people discover their career aspirations. This service costs £85 and includes a full assessment in a Lincolnshire venue lasting approximately 3 hours. Once the psychometric profiling is complete, you will receive a comprehensive booklet outlining your areas of strengths and weaknesses, as well as identifying possible career areas that match the characteristics of the profile. This will be presented to you in a guidance interview with a careers specialist, to help interpret the information and plan a suitable course of action.

Contact us today via email, phone or the website (see below) and give yourself the tools to succeed!
